## Professional Summary

Entry-Level Web Developer and B.E. Computer Science Engineering graduate with hands-on experience in developing responsive web applications using HTML, CSS, JavaScript, and Python. Built e-commerce and Machine Learning applications featuring dynamic user interfaces, data preprocessing, predictive analysis, and interactive dashboards. Hands-on experience with Flask, Pandas, Scikit-learn, DOM manipulation, and LocalStorage through internships and academic projects. Seeking an entry-level web development or frontend development role to apply technical skills and contribute to real-world applications.

## Skills

**Web Development:** HTML5, CSS3, Flask, Responsive Web Design, DOM Manipulation, LocalStorage

**Programming Languages:** Python, JavaScript, SQL (Beginner)

**Libraries & Tools:** Pandas, NumPy, Scikit-learn, Git, GitHub, VS Code

**Visualization:** Chart.js, Leaflet.js

**Machine Learning:** Data Preprocessing, Feature Analysis, Random Forest, K-Means

## Internship Experience

### Hysus Technologies, Thoothukudi , Full Stack Development Intern | Jul 2025 – Aug 2025

- Developed a responsive e-commerce web application showcasing 10+ products using HTML, CSS, and JavaScript.
- Implemented shopping cart functionality with quantity management and real-time price calculations.
- Built product filtering, search, wishlist, and LocalStorage-based cart persistence features.

### BICS Global, Chennai , Machine Learning Intern | Jan 2026 – Mar 2026

- Applied Python and Machine Learning fundamentals through practical mini-projects and model-building exercises.
- Preprocessed structured datasets through data cleaning, feature analysis, and dataset preparation.
- Built and evaluated basic Machine Learning models for predictive analytics.

## Projects

### ShopNest – Responsive E-Commerce Web Application

**Technologies:** HTML5, CSS3, JavaScript, DOM Manipulation, LocalStorage

- Built a responsive e-commerce application with dynamic product listings and category-based browsing.
- Implemented cart, wishlist, search, and filtering features using JavaScript and DOM manipulation.
- Utilized LocalStorage for persistent cart data and optimized the interface for desktop and mobile devices.
- Optimized the application for desktop and mobile devices using responsive web design principles.

### Smart Road Safety and Degradation Analysis System

**Technologies:** Python, Flask, Machine Learning, HTML, CSS, JavaScript, Random Forest, K-Means, Leaflet.js, Chart.js

- Designed an AI-powered system to analyze road condition degradation and accident severity.
- Applied Random Forest for prediction and K-Means for hotspot analysis.
- Implemented a Flask-based web application with interactive maps and analytics dashboards.
- Developed an interactive web dashboard using Flask, Leaflet.js, and Chart.js for visualization.

## Certificate & Training

- Full Stack Development Internship – Hysus Technologies, Thoothukudi
- Python Programming Internship – Iconic Software Solutions
- Machine Learning Internship Training – BICS Global, Chennai
- 30-Day Machine Learning Masterclass – NoviTech R&D Pvt. Ltd.

## Education

BE (Computer Science and Engineering) | DR.G.U.POPE COLLEGE OF ENGINEERING | 80.05% | 2022 - 2026

Higher Secondary Education (Grade 12) | Government Higher Secondary School | 66% | 2021 - 2022

## Languages

- Tamil: Native (Read, Write, Speak)
- English: Proficient (Read, Write, Speak)
